

Grace Muratore

Internship Statement

I desire an internship to get practical experience within the broadcast field of journalism and to make connections within the communications industry. Gaining experience through internships will help me determine what skills I can develop, as well as determine what are my strongest skills. An internship will also add to my journalism experience, allowing me to explore the different tasks and responsibilities of journalists. I hope an internship will help me realize what I enjoy or do not enjoy within the workforce, such as the work environment and the demands of certain disciplines of broadcast (for example, TV versus radio). As of right now, I aspire to work in the TV industry doing production work for a news outlet. This career aspiration is ideal because I have come to discover that I enjoy journalism work that focuses on production aspects or operates behind-the-scenes to put together a broadcast stream.
