

David Matta
Internship Application
August 6, 2022

My career aspiration is to work in film and television production. I am interested in an internship to get more hands-on experience in the film production field. I hope to learn how to shoot film professionally and how footage is used and organized. I look forward to working with professionals in the field to gain real-world understanding of what a career in the field is like. I am excited to work with Penn State Athletics because they have a great reputation, and I feel I can learn a lot, especially in the field of video production for sports.
