

I am very excited to have the opportunity of interning with KeyStone Trails Association, I believe that interning helps build networking, positive relationships, further work ethic and provides many with skills that are useful for post-grad. My career aspirations are nothing short of amazing- I plan to work for an amazing Public Relations Agency in hopes of creating my own empire with proper knowledge, experience and hard work. Interning will provide me with further connections that I need to be in the position possible. Furthermore, interning is a privilege and an experience that I will cherish and treat with the utmost integrity and respect. All in all, I am extremely grateful to have been offered this position and I know that I will use this position to further my overall success both socially and professionally.
