For-Credit Internship Application

I desire to have an internship this semester because I believe it will support my success in the future. This opportunity will provide me with real-world experience that is relevant to my coursework and desired career, strengthen my skillset, and teach me valuable lessons. As an advertising major, an internship would expand my network with real companies and help open the door to job opportunities after college. It would also allow me to understand myself more, such as determining which positions best suit me, what conditions I would thrive under, and what type of work I would enjoy doing most beyond school. Hopefully after college the experience I learn this year will aid me in getting a job at an advertising agency.
