### For-Credit Internship Statement

I desire an internship due to the professional experience that internships can provide. While I have held positions in the past, these positions are retail or seasonal positions that expect me to have the skillset of a full time employee – with no time for learning or expanding as a person. Having the opportunity to intern through the semester will give me a chance to work on the skills that I already have and learn new ones, ones that could help me advance both in the workforce and in life. I hope that an internship like this will allow me to expand and improve my skills as an artist, while also giving me more options in a career in the future. While I study and complete my degrees, I hope that the experiences I have gained outside of a traditional classroom will prepare me for a career in broadcast or live event technical work.
