

My internship with Alex's Lemonade Stand Foundation over the past seven months has been the perfect way to apply the skills learned in the classroom, while also gaining valuable workplace experience. I want my career to be in the communications field, such as public relations, working with either a non-profit or a sports franchise and ALSF has given me the opportunity to achieve that aspiration. Being able to continue this internship for credit would allow me to gain more experience while also applying the new teachings from this last semester before graduating. My time in THON has given me a sense of accomplishment through philanthropy and being able to continue that in the workplace has only bolstered my ambition in my major and career. My hope is that this internship can lead to a job within this company so that I can continue to make a positive difference, applying all I have learned at this University.
