

Chris Worrell
Internship Statement

I desire an internship the ability to learn something that I never knew or the ability to upgrade my knowledge on skills I already had so I can use them for the outside world of Video Production. What I would hope to get or learn for a better word, from this internship is to be able to learn more equipment in the realm of video production. So far I am pretty well versed in camera knowledge but not so much on audio or even live boards. My career aspirations are to be involved with film production, so essentially the making of TV show or Movies. But also learning sports production is also something that I believe can help me in the future secure jobs on my way there and I feel is just a handy and beneficial skill to have in the back pocket.
