

Jan 4, 2023,

Dear College of Communications,

I have recently secured an internship for the Spring 2023 semester with CNET (Centre County). I will be working as a production intern for CNET broadcasting. With this internship, I will gain valuable experience working with producers on the scene of local government meetings in the borough of state college. I will also gain experience in live broadcast, video, and audio production. I am eager to learn more about TV production with this internship.

All the best,

Jeremy Laguerre
