

Molly Sumpolec
Internship Statement

I desired this internship because I can see myself working for media companies. I am genuinely interested in working for a company like this and maybe even owning one of my own one day! What I hope to get out of this internship is experience. I want to be able to learn how to work with others, maintain new skills, and also be able to gain the ability to critically think about making a company better. I want to be able to do my very best at accomplishing all the tasks given to me with excellence. I feel that diving head first into an internship like this is the best way to learn how a company works and how to be an influential part of it! A career aspiration of mine is marketing for a big company or even being a business owner myself.
