Internship credits

Internship Credit Statement

I desire the internship and the credits associated because this is what I want to do as my career. I have always felt a connection with the Public Relations industry including social media, fashion, pop culture, media, and more. My passion began when I was younger, always knowing the happenings and postings on youtube and other social media platforms. I gravitate toward the fashion industry and would love to match a career with my passion. My love for fashion grew when I was younger, and with the help through social media because I would look at videos and pictures of designers and their shows! As for what I hope to get out of the internships is to obtain credits while learning, and getting a full understanding of the industry and the depth of a career. In my resume, I am connected with Penn State and many public relations positions such as ED2010, and VALLEY Magazine to help build my experience further! To have a career aspiration that I am passionate about is very exciting because it motivates me to work hard toward the end goal of what I want, which is a career that I love!
