

## Internship Personal Statement

August 3<sup>rd</sup>, 2022

My previous experiences and future desires have led me directly towards the Live Video Production Internship with Penn State. I have a deep passion for both live broadcasting and sports but have never had the opportunity to combine the two until now. I hope to gain invaluable experience from hands on experience with high quality equipment, as well as study the words and actions of people who are familiar with the industry. I am uncertain of where I would like to take my career, but I hope that this internship gives me the clarity and connections that will push me towards the right path. The Live Video Production Internship with Penn State would be an exceptional next step for my development as a student, broadcaster, and young man.
