

Statement:

I want to work abroad, and I think Brno is a great choice. A lot of students are looking to work in Italy, London, and Spain, but I think the Czech Republic is out of its comfort zone location. Czech Republic is known to be open to expats and has a low-cost quality of life. I am looking for the experience to be more independent and confident with my choices. I think this program is a unique opportunity that would gain some insights into the person I want to be after graduation. I see myself in the strategy or branding field, landing an internship abroad would help me one, determine the field I aspire to work in and two, get me the connections to make working abroad in Europe a dream come true.
