

I desire an internship to advance my skills withing the field of journalism and learn from those who are experienced in the field. I believe that this internship with BizBash will not only help me become a more advanced writer, editor and journalist, but I believe it will help me become more confident and creative in the field as well. I hope to secure a summer internship with an in-person news outlet following this semester, and I think this internship will greatly prepare me for that as well. I hope to either become a journalist one day, or continue to graduate school for public relations, which is an area that this internship will allow me to dabble in as well. It will advance me in my field and help me develop my style and ability as a journalist.
