

Statement

I am looking forward to this internship to further my skills in social media. I would like the opportunity to be able to have the creative freedom for content creating and strategy planning. For my career, I aspire to enter an advertising firm, possibly doing social media. One day, after gaining enough experience, I can see myself running my own full-service ad agency for small business or Ecommerce stores. I believe this internship will give me the building blocks for my career path.
