

From this internship I hope to gain experience in my intended future field. I want to experience a small scale version of media management as well as learn strategies and tips from more experienced members of the field. I also hope to network with other students and professionals to gain connections in the industry. This experience will give me a great introduction to public relations and one style of work a PR professional can do. I hope to learn a lot of information about media management that I will be able to use the rest of my college career and beyond.
